

Candle Thru Arm

MANUFACTURED AND RELEASED BY MAK MAGIC CO. COLUMBUS OHIO USA

U.F.Grant brings you another beautiful and stunning effect which can be featured in any act!! You won't want to do a show without this starting effect.

This works like our famous "Spikes Thru Balloon" and is similar to our "Torch Thru Arm".

You are supplied with a cylinder with a hollow tube running across the center, and a long candle. It is nice to have a candle holder for the candle.

Remove the candle from the holder, pick up the cylinder and push the candle through. Then tip the cylinder so the audience can see through the cylinder. They apparently see the candle running through it. This way you have shown the cylinder empty.

Turn the cylinder upright, remove the candle and replace it in the holder. Light the candle. Then slide the cylinder over the arm. You will notice that the tube is slightly off center so you can slide your arm through. The hand comes out the bottom and curls around the end of the cylinder and holds it, as pictured in the advertising.

Your free hand picks up the holder with the lighted candle and pushes it up and slowly through the cylinder, and apparently through the arm. It is very effective as the flame comes up and out of the top of the secret tube. You can toss a piece of flash paper into the flame for an added effect if you like.

Pull the candle out and replace it in its holder on the table. Remove the cylinder and drop it down over the candle and holder, onto the table, so the lighted candle sticks out of the top. Extinguish the candle and go into your next effect.

DECEPTIVE LIGHTED CANDLE THRU ARM
