

DOVE OF PEACE

AN APPEALING PATROTIC TRICK

BY U.F. GRANT

We send you two metal cylinders, and two clear plastic tubes that nest. The inner plastic tube has a hook at the top. Load the plastic cylinder with the hook on, with a dove, and then a load of colored silks. Have this hooked inside the inner metal tube. Have the outer metal tube to one side of it. Also have nearby the other clear plastic tube, and you are all set.

Pick up the outer metal tube and show it empty. To prove that it is empty, drop your inner metal tube thru it, by holding outer tube a few inches above the table top, this transfers the hook gimmick to the outer tube. Then show your smaller tube empty.

NOW grasp the outer tube inside the top, with your fingers inside to hold the load container down, as small tube is pushed up inside the outer tube from the bottom.

Then take a square of tissue paper and snap it over the top of the nested tubes and hold it in place with a rubber band. Break thru the paper and produce the silks. Mention that they are the colors of the flags of all the nations.

After the silk production, tear off the tissue paper. Place the silks in the clear plastic tube, that has been in full view at all times. Fill the tube with your silks. Now, again grasp the nested tubes at the top, to hold the inner fake tube from popping out of the top, as you push the tube with silks in it, up into the nested tubes from the bottom. As it goes up into the tubes, the inner tube will emerge from the top. Pull it all into the tubes, the inner tube with silks concealed inside the nested tubes.

Show the colors of the nations have changed into a "Dove of Peace".
Peace on Earth, Good Will Towards Man.
