We send you a tall can with a partition in the center..Turn it with largest part of container (Actually the bottom) too the top and invert in this the glass painted white and then pour into the can all around the inverted glass the rice,fill compartment full to the brdm,then invert a tray over all and turn can upright on the tray..Now fill the top half of container with enough water to fill the concealed glass up to edge of white paint..

Also on table have the outer cylinder that comes with the outfit..And a glass tumbler with just a little water in the bottom with a few goldfish in it and a silk on table to front of this glass,to hided the fish and water in the bottom of the glass...Thus it appears as a empty glass.. Your Are Now All Set.

Show the large cylinder empty and drop it over the outside of the water can to further prove it is empty..Then reach in top and pull can up and out of the cylinder,this secretly leaves behind in the cylinder the mouth up glass and rice all around it...

Pour water from can down into cylinder,so it goes in the glass...Now lift cylinder up and away from tray,with fingers inside and take glass along with cylinder,thus the water poured into cylinder has changed to rice....Let cylinder slide up on o arm to reveal a glass of milk at finger tips,swish glass around a little,thanks to water up to water level the painted glass appears as a real glass of milk,with movement of top level of liquid.

Wrap a piece of paper around glass of milk,punch a hole in top and free hand picks up glass from table so the fingers hide the fish,pour from wrapped glass,in place of milk,water of goldfish...Place wrapped glass : : aside...

One Magi wraps glass in stiff type of paper and after pouring water from wrapped glass,lets glass slide out of paper into well or servante and paper still has shape of glass,as if still in there..Walk foward and crush paper and glass apparently vanished at that moment.

Dr.Ritchey uses MOXAHALLA in combination with Rice Bowls..After rice changes to water from rice bowls,pours water from rice bowl into the can..Then in Moxahalla the water changes back to rice,then milk changes to water...Very effective routine...
