

## GRANTS NU-WAY WAND THRU BALLOON

\*\*\*\*\*

Original Idea By Robert J. Gurtler.

NOW - You May Hand The Cylinder For Examination To Fool Those ~~that~~ knew the old way.. This new one has a detachable tube that runs thru center that may be stolen away with the wand..To steal it away,we will say wand is thru cylinder and tube,grasp wand up near hole in cylinder at end that has disc..give disc. a slight turn one way or other and pull it and tube away with the wand,hand holding wand up near center so as to hide disc..To reset before working the trick,pish wand thru holes and twist disc. into hole slightly one way or the other and it will catch,this works at either side of cylinder.

Working:- With tube all set in cylinder you are all set..Pick up wand and show it and push it thru cylinder and spin on same,push cylinder up so they can see thru same and fake looks like center of wand..Up-right cylinder and remove wand and use a long type balloon,like the type we send..Lower it thru cylinder so about a third sticks out the bottom..hold hand down against top of cylinder and inflate balloon so it inflates out bottom of cylinder first,then remove hand from top and continue untill it inflates above,tie end of balloon and you are all set for the penetrations.

Push a small soda straw thru holes and blow smoke thru it,or even drink thru it...Use straw as guide to push a narrow baby ribbon through and pull that back and forth and finally out..Lastly the wand and as wand is pulled away,take fake with it..Then hand the cylinder with inflated balloon right out,so they may let air out or burst balloon and examine the cylinder..This is real MAGIC.

Once in a great while you will find that when pulling wand and gimmick out it will burst balloon,if so,make out that was the way you intended and hand cylinder for examination.

Patter Suggestion:- Many,many wonderful things have appeared on the Magical Horizon Thru-out The Years..But here is the most Fantastic.. It Is Just Impossible.. Some Say Hypnotism,others say Mechanics, while others "Science"... I call It "GOOD MAGIC"
