

SENSATIONAL SACK - X .

BY U.F. GRANT ----- PATENT APPLIED FOR

The Sack Comes To You Turned in-side-out...Open end has two partitions. In showing the bag,run it up on your hands and arms at the partition side that has the even hem..Let bag pleat up on your arms,so your hands get down to the bottom inside and show the bottom of bag and side seams are solid,no zippers,openings etc.etc.

Now while hands are up inside bag at the bottom,they grasp the bottom outside edges and shake the bag off the arms as it turns in-side-out, allow the ends that come off the arm to drop on the floor,then ends that are left in the fingers,are allowed to drop down on top of all....

Now pick up the bag at ends just dropped off or out of fingers,this is the formerbottom ,but now acts as the top,and just has the two edges that appear as a ordinary bag opening,no center partition to show..So you can get into the bag and let them tie the top and put a screen around you..You will find you can get out of the bottom,untie the bag,turn it back inside out by hands going up into bag on the side that has the even seam,then retie the bag and as long as it is left tied,they may look bag over...

BOY FROM AUDIENCE ESCAPE. - Have a cardboard carton that has no top of bottom and stands about 3 feet high..Put bag on floor and show carton and drop carton over it.Have bag on floor so the open sections are on the bottom and reach down in carton to straighten bag out and spread open part on floor so floor shows..Now as you have boy step into bag,inside the carton,his feet go right onto the floor...Pull bag up over his head as he is instructed to scoot down inside of bag in semi-sitting position. Tie top of bag with a rope or ribbon...Now you can pull bag right out of box and boy is gone,pull carton up and away to show boy escaped from the bag...

WHERE YOU ARE TO USE TWO IN THE BAG:- Use end of bag that has the partitions at the top... Place a girl in bag on side that has the uneven seams in and boy in other side... Tie top and girl escapes and boy is left tied in bag, If you want to use two in a bag,such as your girl assistant and a man or two girls,for adults you will need a larger bag.

FOR SUBSTITUTION EFFECT FOR TRUNK SUBSTITUTION ETC.- Where one wants to get back in the bagHave the top end of the bag they get into the end with the partitions at the top..And get in the part that has the rough seams ..Now you can get put fhe bottom and assistant can get back into the bag at the bottom and be sure to be in the correct side,as the bottom in this case,has only one place to go...
